Guide to Create a Bot Using BotFather on Telegram

❖ Step To Create BOT Telegram:

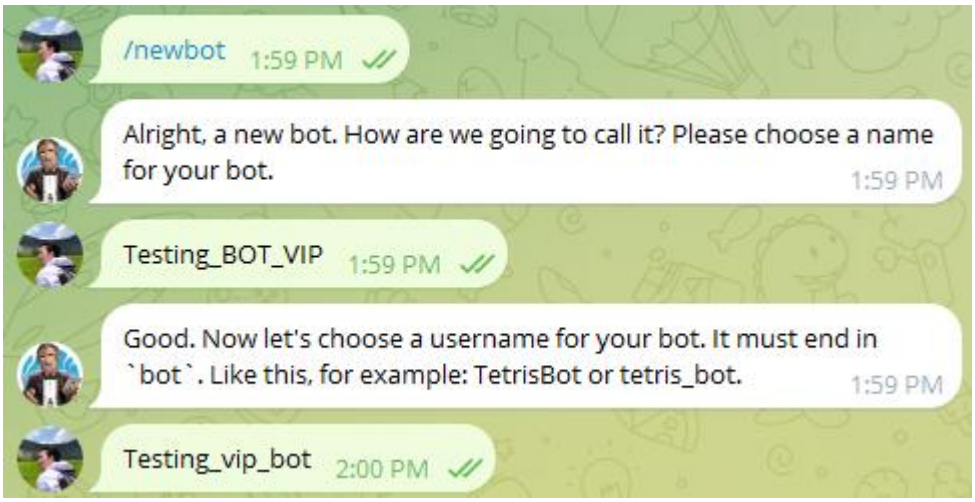

I. Open BotFather

a) Search for **BotFather** on Telegram or visit the link: **https://t.me/BotFather.**

II. Create a New Bot

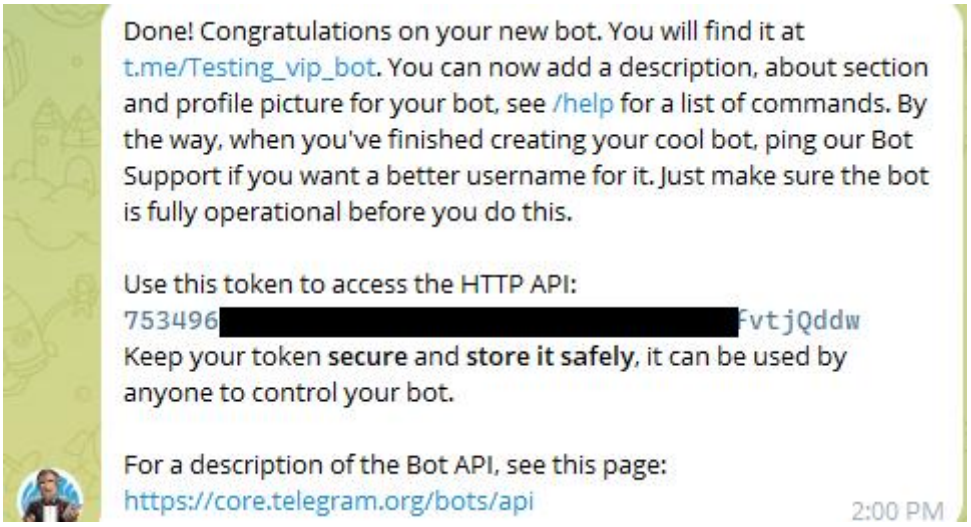

a) Send the command **/newbot** to BotFather.
b) Follow the instructions:
   i. Set a name for your bot (e.g., MyFirstBot).
   ii. Choose a username for your bot (must end with bot, e.g., myfirst_bot).

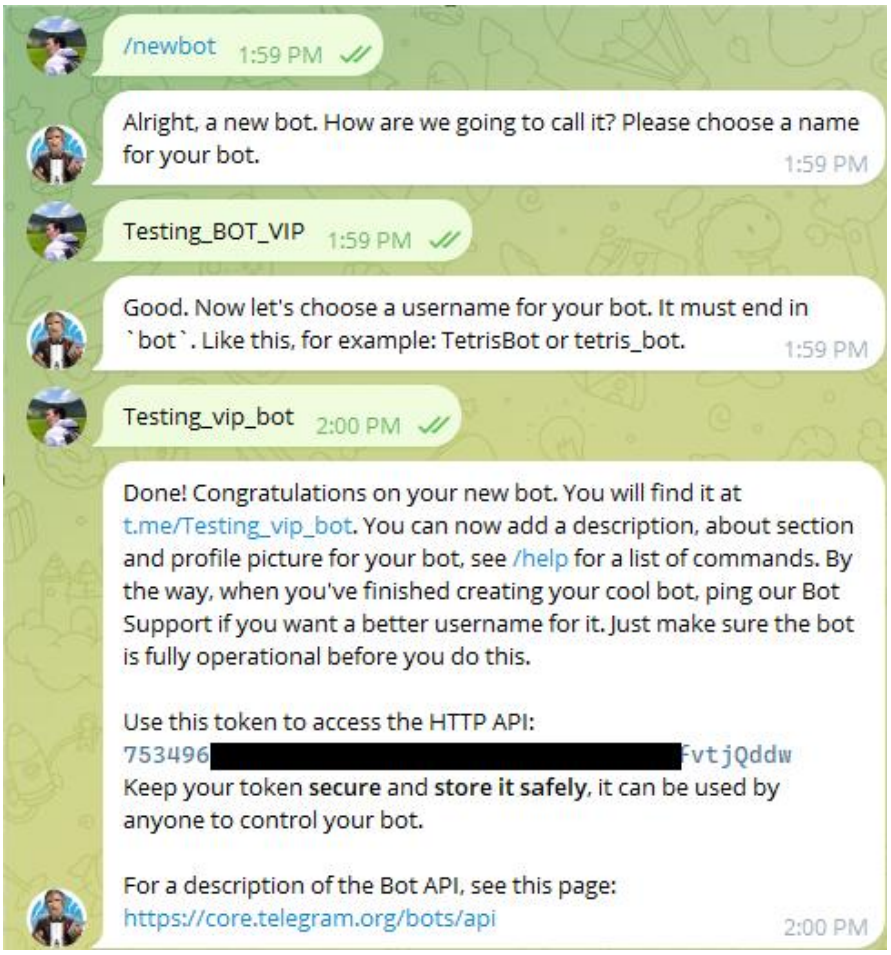

III. Get the API Token

a) After successfully creating the bot, BotFather will provide you with an **API Token** (e.g., 123456:ABC-DEF1234ghIkl-zyx57W2v1u123ew11).

b) Save this token for use in API calls or programming your bot.

FULL CHAT WITH **BotFather:**

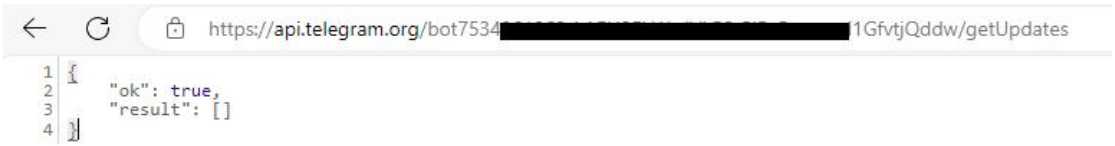

❖ Step To Get ChatID For BOT Telegram Send Messages:

Step 1:

Open link on any browser:
https://api.telegram.org/bot<YOUR_API_TOKEN>/getUpdates
replace TOKEN into <YOUR_API_TOKEN> in the link when creating Telegram Bot part III

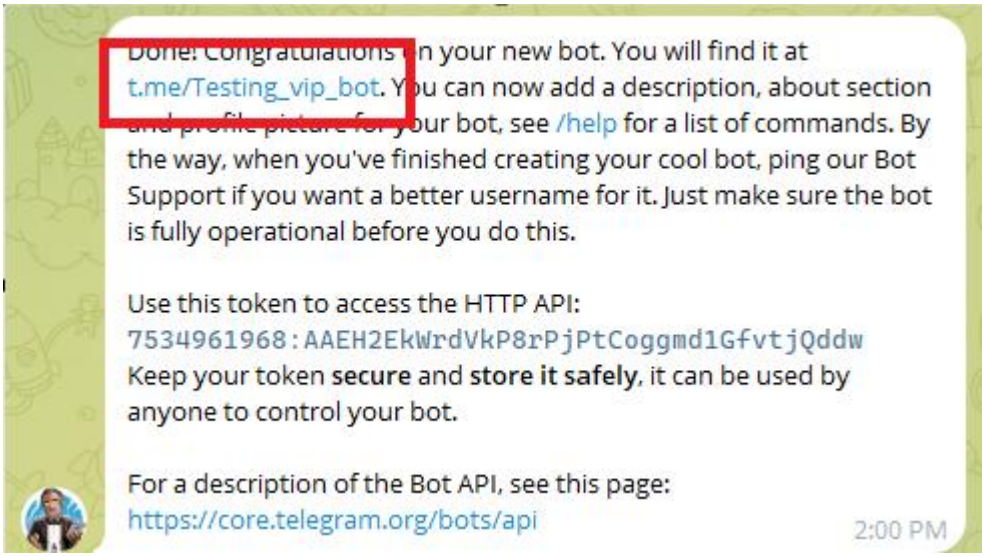

Ex:

Step 2:

Click link **t.me/<Your_Bot_Name>** in the link when creating Telegram Bot part III

Ex:

Step 3:

- Click Start and Chat with Bot with any sentence
- Reload link on Step 1
- Now You Can See Your_ChatID and save it

❖ Attach chatid and botToken to config.py file

Open the **config.py** file in the **config** folder >> locate **chatid** and **botToken**, then assign the corresponding values.

Ex:

```
setting = {
    "timeout" : 100,
    "headless" : True,
    "env" : "pro",
    "lang" : "en", # using ch for china language
    "site" : "LAP",
    "isUseBrowser" : True,
    "browser" : "chromium", # chromium,firefox, webkit
    "isConnectDB" : True,
    "isTrace" : True,
    "pathTrace" : "Trace\\trace.zip",
    "botToken" : "123346:ABSASD:AAA123",
    "chatid" :  ["123423243(personal)","-123214123213(chatIdgroup)"],
    "conversationId" : ["<channelID_will_be_sent1>"]
}
```
