Guide to Create the *client_secret.json* File for Google Sheets API

I. Access Google Cloud Console

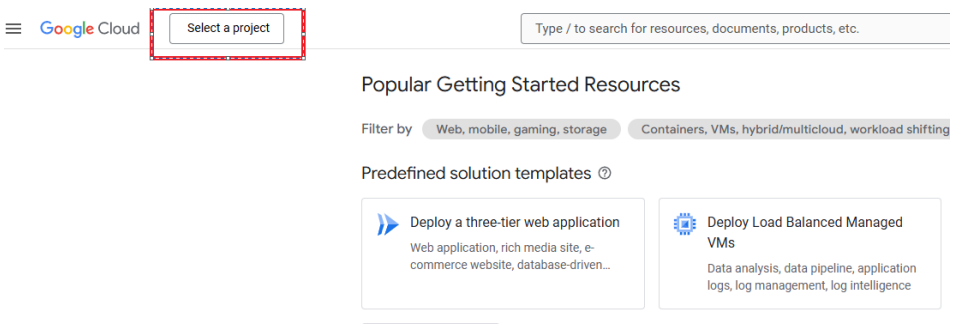

1. Open a web browser and go to Google Cloud Console.

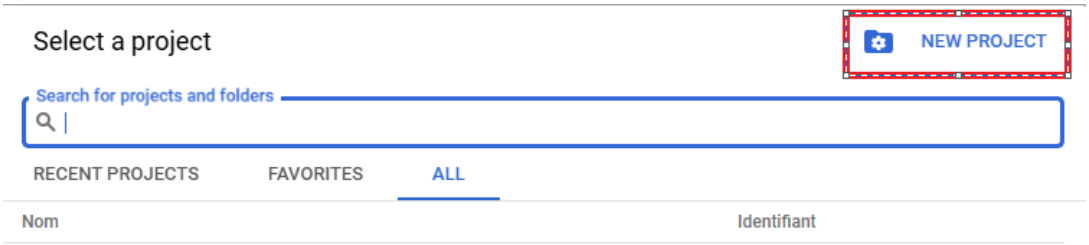

2. Log in using your Google account.

II. Create a New Project

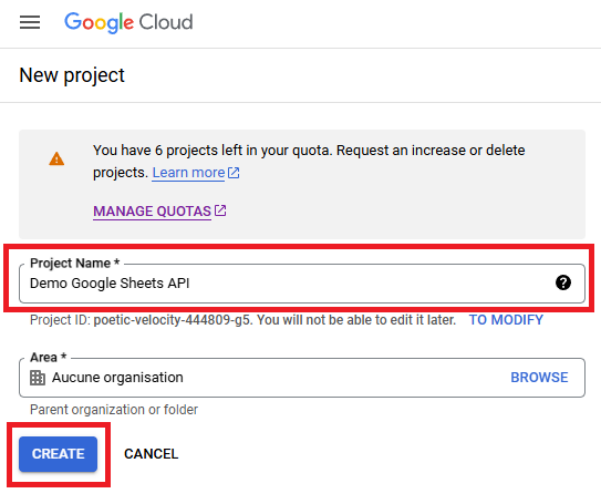

1. In the Google Cloud Console interface, click on the **Select a Project** dropdown at the top of the page.

2. Click **New Project**.

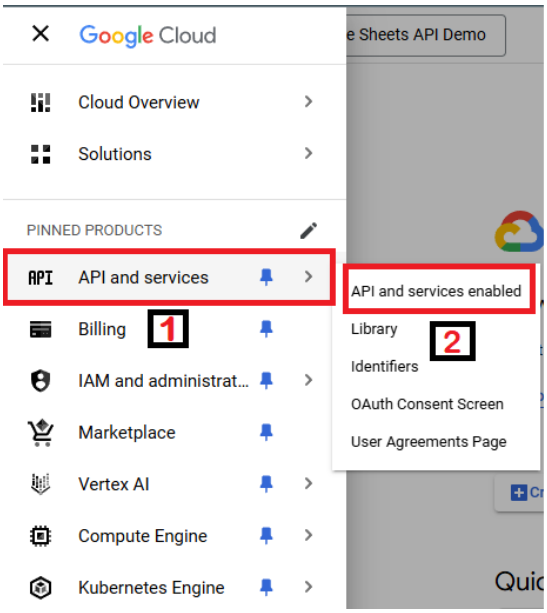

3. Enter a name for your project (e.g., Demo Google Sheets API).
4. Click **Create**.

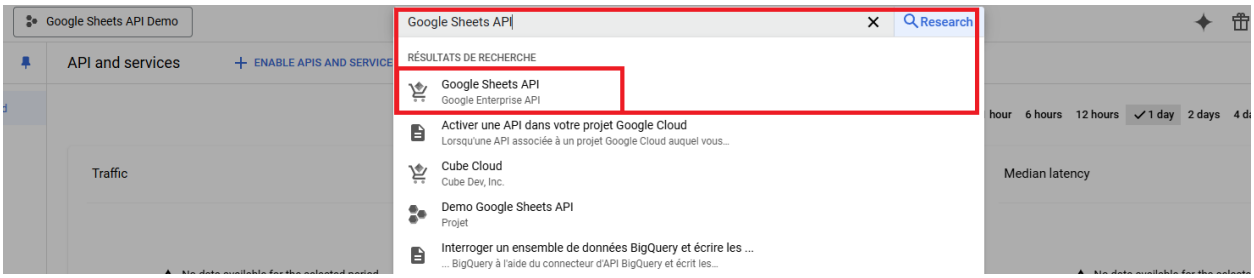

III. Enable the Google Sheets API

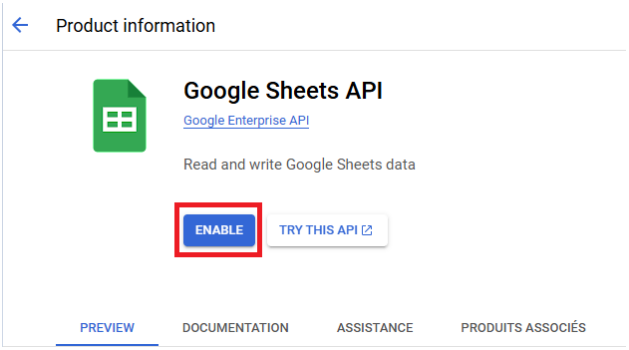

1. Navigate to the **Navigation Menu** (three horizontal bars in the top-left corner) > **APIs & Services** > **Enable APIs and Services**.

2. Search for **Google Sheets API** in the search bar.

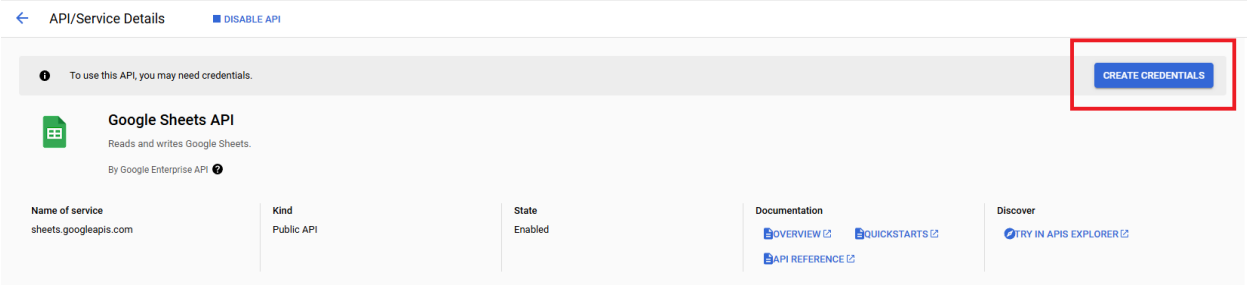

3. Select **Google Sheets API** and click **Enable**.

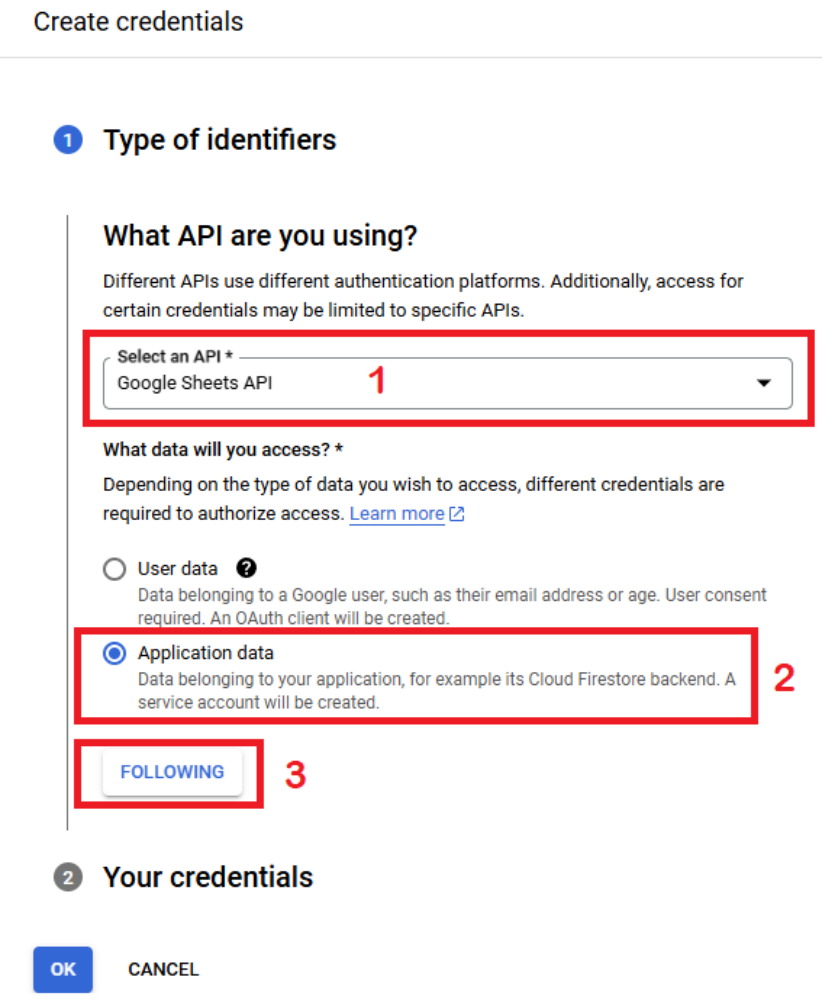

IV. Create Credentials

1. After enabling the API, click **Create Credentials** in the top-right corner.

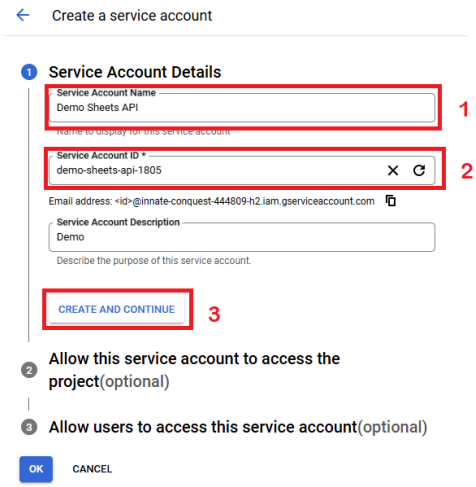

2. In the credentials wizard:

    a. **Which API are you using?** Select **Google Sheets API**.
    b. What data will you access? Select **Application data**
    c. Click **FOLLOWING**

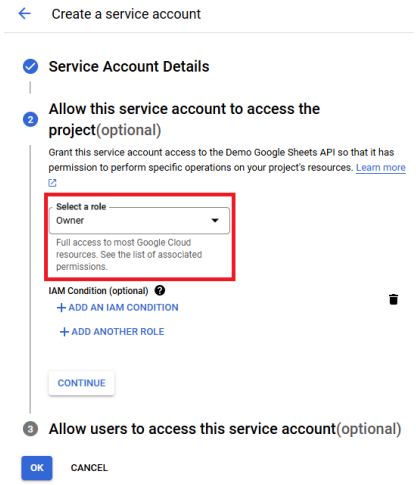

V. Create a service account

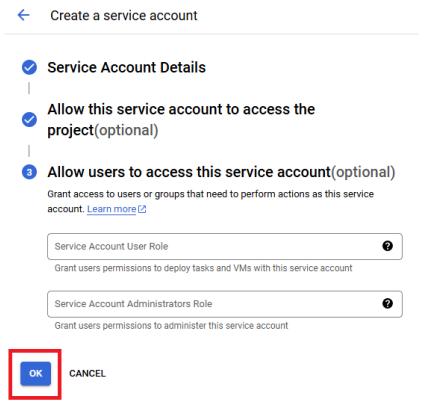

1. Service Account Details:

2. Allow this service account to access the project

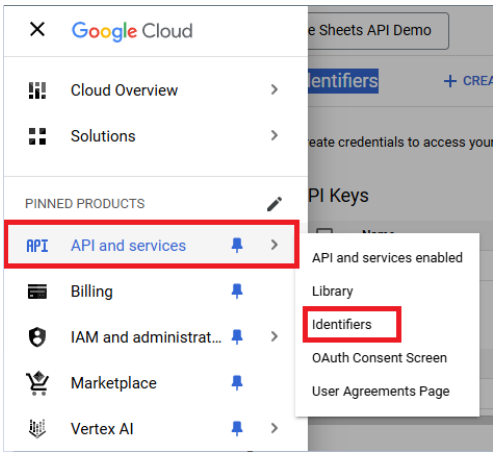

3. Allow users to access this service account

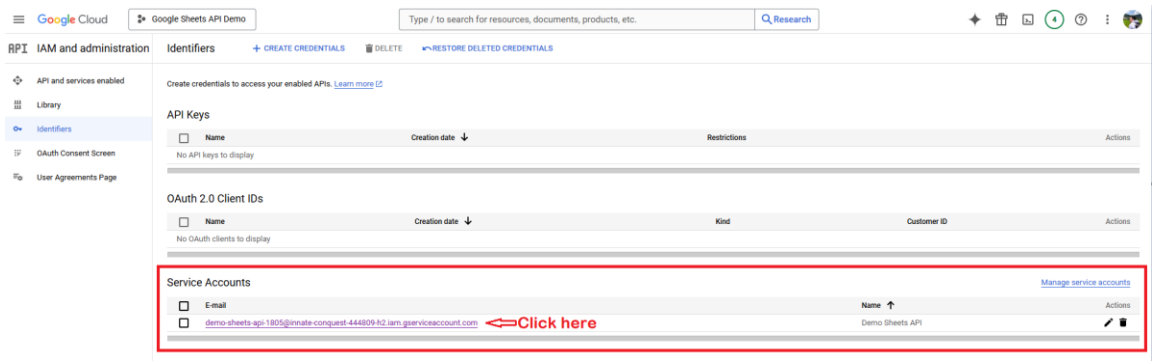

VI. Download the client_secret.json File

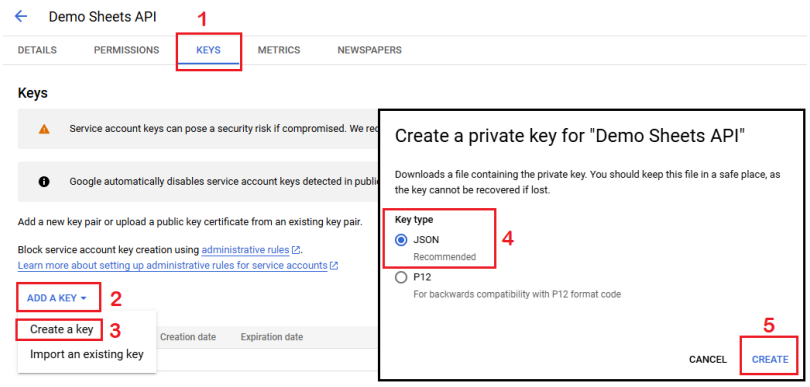

1. Return to **Navigation Menu** (three horizontal bars in the top-left corner) > **APIs & Services** > **Identifiers.**

2. Select Service Accounts Created:

3. Create Secret Key .json

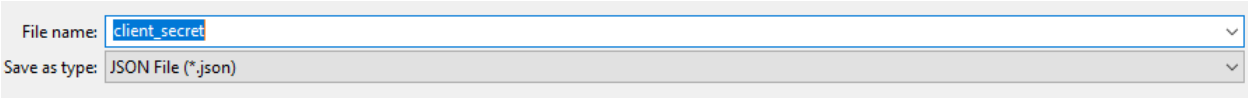

Sample file

```
{
  "type": "service_account",
  "project_id": "innate-conquest-444809-h2",
  "private_key_id": "c1454f393e909ca0234f29f4215df07f43308d38",
  "private_key": "-----BEGIN PRIVATE KEY-----\nMIIEvgIBADANBgkqhkiG9w0BAQEFAASCBKgwggSkAgEAAoIBAQCk3A3XvrM/pLfA\nAk0CaPwOnGtEfzgCZij6Pk2pLTd03wszhIz1uTzsUFxqCzd1OV/t3mU3K
  "client_email": "demo-sheets-api-1805@innate-conquest-444809-h2.iam.gserviceaccount.com",
  "client_id": "102297828157726814263",
  "auth_uri": "https://accounts.google.com/o/oauth2/auth",
  "token_uri": "https://oauth2.googleapis.com/token",
  "auth_provider_x509_cert_url": "https://www.googleapis.com/oauth2/v1/certs",
  "client_x509_cert_url": "https://www.googleapis.com/robot/v1/metadata/x509/demo-sheets-api-1805%40innate-conquest-444809-h2.iam.gserviceaccount.com",
  "universe_domain": "googleapis.com"
}
```

VII. Save the File

1. Rename the downloaded JSON file to client_secret.json.

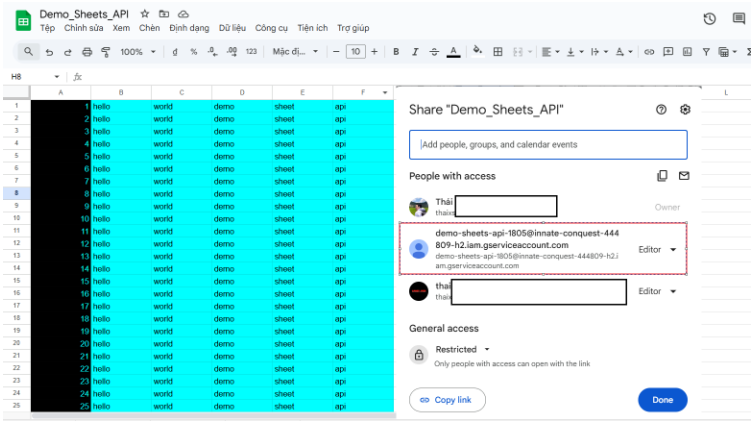

2. Move it into your source code auto's **config** folder

   Ex:

   D:\Automation\automation_python_playwright\config\client_secret.json

VIII. HOW TO USE

First you need to share "**client_email**" in "**client_secret.json**" file depending on the permission you use the service.

Ex:

```
"client_email": "demo-sheets-api-1805@innate-conquest-444809-
h2.iam.gserviceaccount.com",
```

Now it can be processed to be able to print out the data in gg sheet
